AGM (Absorbed Glass Mat) Batteries

Universal High
Performance
Applications

FEATURES - BENEFITS

- Feature** - High output cold cranking amps
- Benefit** - Excellent for high demand starting & electrical systems
- Feature** - Increased reserved capacity
- Benefit** - Superior for infrequent use & key off demand
- Feature** - Spill proof / leak proof
- Benefit** - Safe for in cabin fitment
- Feature** - Valve regulated venting system
- Benefit** - No gassing = 100% maintenance free

WORLD SOURCE ONE maintenance free AGM line offers the latest innovation in high-powered, spill-proof, leak-proof batteries. Featuring AGM (*Absorbed Glass Mat*) this technology and unique sealed construction eliminates acid spills, terminal corrosion and you never have to check fluid levels!

AGM technology has become the next step in the evolution of both starting and deep cycle sealed batteries used OEM on late model luxury vehicles including the BMW 7 series and Mercedes S class. AGM is also the technology of choice for racing and off-road, high output audio, the collector car market as well as marine, RV and aviation applications.

Exact Fit container replacement battery matches OE battery size

Valve regulated Venting System

Forged terminal post bushings resist acid leakage for improved life and performance

AGM Technology (*spill-proof, leak-proof, totally maintenance-free*)

Full Frame Calcium Alloy Positive & Negative Grids (*more cranking Amps, efficient trouble free life*)
